Export your current network:

... as a bitmap image:	download	*file format is 'PNG': portable network graphic*
... as a high-resolution bitmap:	download	*same PNG format, but at higher resolution*
... as a vector graphic:	download	*SVG: scalable vector graphic - can be opened and edited in Illustrator, CorelDraw, Dia, etc*
... as short tabular text output:	download	*TSV: tab separated values - can be opened in Excel and Cytoscape (lists only one-way edges: A-B)*
... as tabular text output:	download	*TSV: tab separated values - can be opened in Excel (lists reciprocal edges: A-B,B-A)*
... as an XML summary:	download	*structured XML interaction data, according to the 'PSI-MI' data standard*
... protein node degrees:	download	*node degree of proteins in your network (given the current score cut-off)*
... network coordinates:	download	*a flat-file format describing the coordinates and colors of nodes in the network*
... protein sequences:	download	*MFA: multi-fasta format - containing the aminoacid sequences in the network*
... protein annotations:	download	*a tab-delimited file describing the names, domains and descriptions of proteins in your network*
... functional annotations:	download	*a tab-delimited file containing all known functional terms of proteins in your network*
